Subject: RE: ANY AIR ISSUES for the WV Elk River issue?

At our ORC meeting, I heard the OSCs on site in Charleton, WV have set up air and water monitoring so I wanted to let you know in case anyone mentions to APD the air monitoring at the site.

Also- WVDEP – Dept of Air Quality issued a NOV to Freedom Industries on Thursday citing the company for “odor” violations related to the spill. So- I don’t believe we have any continuing CAA issues and WVDEP cited them for something not in the WV SIP. However, the NOV does contain some factual observations related to what the DEP inspectors observed re: the tank and spill so it is possible subsequent investigations by EPA (under non-CAA statutes) may involve discussions with those inspectors.

Subject: ANY AIR ISSUES for the WV Elk River issue?
Importance: High

I have to attend a meeting in ORC covering this water spill. If you have any air concerns, can you please let me know ASAP? Thanks!! So far- from the OSC report I was told about, I don’t think there are any air concerns
